

# Hudson Valley man on a mission to spread Immune Health to the world

By Joe Doran

The Northern Dutchess and Southern Columbia corridor is rightly known as one of the most beautiful regions of the Hudson Valley and the world. But might it also be recognized one day for spreading the word about a one-of-a-kind natural immune system nutrition booster and glutathione precursor that supports many health conditions. It will if Joseph V. Cassarino has anything to say about it.

ProImmune® - Immune Formulation 200®, is a patent-pending dietary supplement that Joseph understands can make a difference in improving the health of just about anyone. Joseph says, A Google search of the word Glutathione with whatever is troubling you on the PubMed/National Institutes of Health website will provide thousands of research reports to show how Glutathione may help you.

## A Master Antioxidant, And A Happy Accident

When Joseph met the inventor of ProImmune, Dr. Albert Crum (M.D. MS, D.Sci-Hon) in Rhinebeck several years ago he was intrigued by the man and his professional work and Dr. Crum was intrigued and impressed over Joseph's background and business accomplishments. Dr. Crum asked Joseph to submit his resume and a professional business relationship and friendship formed. A graduate of Harvard Medical School, Dr. Crum gained renown both for his bio-

chemistry research and a concern for humanity. He was awarded a Harvard Medical Student Research Fellowship and merited Honor grades for his research, and holds a Master of Science degree from New York University, and a Doctor of Science (Hon.) degree from the University of Redlands (CA).

Dr. Crum has been called into counsel or Audiences with many world leaders, including an Audience with Pope John Paul II, now Pope Saint John Paul II, and with His Holiness the Dalai Lama and many others. In 1974, Dr. Crum, a non-sectarian, was awarded the Pope John XXIII (now Pope Saint John XXIII) Gold Medal with a sacred embedded Relic of Pope Saint John XXIII. Dr. Crum served as co-Chair of the U.S. Coordinating Committee Supporting the Nomination of His Holiness the Dalai Lama XIV of Tibet for the Nobel Peace Prize. Dr. Crum is also a 2018 Albert Nelson Marquis Lifetime Achievement Award recipient.

"Dr. Crum made his groundbreaking scientific discovery over many years of laboratory research," says Joseph. "ProImmune is a scientific formula that he worked on to discover glutathione synthesis, and Dr. Crum's motivation was that he always felt that there should be a way, where the [human] cell could make its own glutathione exactly as nature intended." Joseph, an avid practitioner of a healthy life-style had never heard of glutathione. "The bottom line is, the average person has no awareness of glutathione. I didn't, before I met Dr. Crum four years ago. I'm 65 years old and I'm

a health oriented person but I did not know how important glutathione is and I am discovering that most people do not know what glutathione is or how toxins and stress inside the cells called, oxidative stress cause cells to decay or die and that glutathione helps the body reduce decay.

Joseph learned that glutathione is so important to the body and immune system and general health, that it is referred to as the "master antioxidant." And Dr. Crum, funded in part by \$88M in grants from the National Institutes of Health (NIH), was on the cutting edge of glutathione research. His work was trailblazing not only concerning understanding of what glutathione does. He also discovered a crucial combination of natural precursors nutrients that could help the body manufacture optimum amounts of glutathione at the cellular level.

## A Personal Experience For Joseph with Immune Formulation 200®

When Joseph came down with COVID, he was able to avoid a hospital visit, and fight off the virus without much trouble. I never even walked into a hospital and I am 65 years old. "I attribute that to a very strong immune system. And that's what ProImmune does. ProImmune builds the immune system. Why? Because it's reducing the oxidative stress, it's reducing the free radicals, it's reducing the toxins.

"By making the glutathione inside the cell, and only as much glutathione as the

Joseph V. Cassarino

cell needs to reduce the toxins and the oxidative stress, discharging what it doesn't need, it actually is the most efficient and effective implementation, over any method of glutathione supplementation and I learned this by sitting in meetings with Dr. Crum's legal rep and with top scientists of the world."

Joseph V. Cassarino has developed an ecommerce website that offers free shipping [www.thebestimmunesupport.com](http://www.thebestimmunesupport.com) "I put so much education concerning the product onto the website," says Joseph. "There's the science, the data, the links to the NIH health report that all prove the importance of what glutathione does and the science of what Dr. Crum's discovery provides for optimal glutathione replenishment.
